

# 2016 INOCULANT GUIDE

CHR HANSEN

## Biomax 5

- All purpose inoculant for haylage and corn silage
- Improves fermentation time
- Strong name and brand recognition
- Best cost product in the line-up

## Biomax O (Organic)

- Same attributes as the Biomax 5 product without the carrier to meet the needs of the Organic producer

## SiloSolve MC

- Recommended inoculant for haylage
- Very strong fermenter offering reduced fermentation time
- Inhibits Clostridia growth and butyric acid
- Allows harvest over a greater variation of moistures
- University validated 2 pound milk response

## SiloSolve AS

- L. Buchneri with least amount of dry matter lost
- Reduce heating and improve aerobic layer
- Reduce growth of yeast and mold
- Enhance bunk life

## Biomax SB

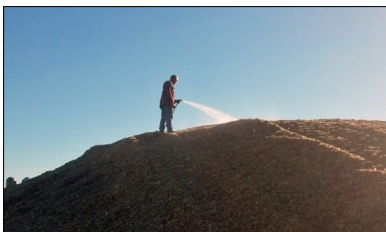

- Increase starch digestibility in corn silage and high moisture corn
- Breakdown prolamin matrix faster
- Improves fermentation time
- Reduce dry matter loss of sugar and starch

## SiloSolve OS

- Apply only to surface right before plastic covering
- Reduce dry matter loss up to 60% in top layer
- Improve aerobic stability
- Combination of bacteria and Sodium benzoate preservative

## SiloSolve FC

- Scavenges oxygen to produce lactic acid
- Allows for early opening of feedstuff
- Reduced heating and improve aerobic stability
- Combination of bacteria and Sodium benzoate preservative
