IMPORTANT EPA PAPERWORK ENCLOSED

Dear Customer:

The Environmental Protection Agency's (EPA) Worker Protection Standard (WPS) went into effect as of January 1, 1995. The WPS is a federal law that was put into place to help protect workers on agricultural establishments (including farms) from overexposure to pesticides.

The WPS spells out specific responsibilities of employers and businesses involved with the sale, use, and application of pesticides. One responsibility we, as a custom applicator, have is to give you certain information about the pesticides we apply on your land. This is called Information Exchange.

Under WPS, if you have non-family member workers, you are required to have an area where you post the name, address, and phone number of the nearest emergency medical facility; a pesticide safety poster; and information about pesticide applications to your land. You must make personal protective equipment (PPE) available for your workers, and it is also your responsibility as the land operator to post the fields if required by the label.

Enclosed is a list of WPS information Exchange for the products that we normally custom apply. **You must keep these available for future reference.** This sheet supplies most of the information that the WPS requires you to relay to your employees. It also states when you are required to post a field if a particular pesticide is applied. This list is also available to you on our All American Co-op website at <http://www.allamericancoop.com>.

As a full service dealer, we strive to help you with all your needs. We are supplying you with the information needed to help you comply with this regulation. As an added service, we are also stocking the PPE that is required on the labels.

We all hope you have a safe and productive spring.

Sincerely,

Glenn Lutteke
General Manager
GL/dr
Encl

IMPORTANT STATEMENTS: NEEDED WITH ANY PESTICIDES!

Progressive Ag Center, LLC

1/30/2011

DISCLAIMER: This information is supplied as a service by Winfield Solutions, LLC which can in no way be held responsible for any misprints, omissions, or incorrect information contained in this Worker Protection Standards Guide. This guide is for quick reference only. Users should always refer to and follow the manufacturer's label for specific information. Always read and follow label directions.

Recommended: Wear socks, shoes and CHEMICAL-RESISTANT gloves (such as Barrier Laminate or Viton) when working with any pesticides. Wear chemical-resistant headgear for all overhead exposure. **IN ADDITION:** PPE listed is for handlers, exceptions are noted for mixers/loaders or handlers handling undiluted products. Use of closed cabs and closed handling systems may allow modification of handler PPE (see label).

IMPORTANT STATEMENTS: NEEDED WITH ANY PESTICIDES! Progressive Ag Center, LLC

DISCLAIMER: This information is supplied as a service by Winfield Solutions, LLC which can in no way be held responsible for any misprints, omissions, or incorrect information contained in this Worker Protection Standards Guide. This guide is for quick reference only. Users should always refer to and follow the manufacturer's label for specific information. Always read and follow label directions. 1/30/2011

Recommended: Wear socks, shoes and CHEMICAL-RESISTANT gloves (such as Barrier Laminate or Viton) when working with any pesticides. Wear chemical-resistant headgear for all overhead exposure. **IN ADDITION:** PPE listed is for handlers, exceptions are noted for mixers/loaders or handlers handling undiluted products. Use of closed cabs and closed handling systems may allow modification of handler PPE (see label).
