

# Stress Care Products

## **Purina Stress Tub**

Purina® Stress Tub is a free choice supplement designed for young cattle prior to or after stress and breeding animals. This product is recommended for use in pre-weaning and weaning situations, receiving and hospital pens, as well as to the breeding herd 60 days prior to calving and through the breeding season.

## **Purina® Stress Care™ Supplement 1**

STARTER SUPPLEMENT FOR FEEDLOT CATTLE

Purina® Stress Care™ Supplement 1 is a starter supplement designed to be fed at 1 to 1.5 pounds per day to starting cattle along with grains and forages to make a complete diet.

- Low feed rate
- Can be easily included into a limit fed grain mix with free choice grass hay
- Can be fed in a TMR ration with on farm feedstuffs
- Ideal where calves are supplemented a ration alongside the cow similar to their weaning ration

## **Purina® Stress Care™ 5**

STARTER SUPPLEMENT FOR FEEDLOT CATTLE

Stress Care™ 5 is a semi-complete feed designed to be fed at 5 pounds per day to starting cattle along with hay or grass.

- Moderate feed rate
- Can be fed in a TMR with on farm forages
- Can be fed as the sole supplement at the 5 pound feed rate with forage
- Transitions calves onto feed quickly with a familiar texture similar to pelleted creep feed

## **Purina® Stress Care™ 10**

STARTER SUPPLEMENT FOR FEEDLOT CATTLE

Purina® Stress Care™ 10 is a semi-complete feed designed to be fed at 10 pounds per day to starting cattle along with hay or grass.

- High feed rate
- Formulated for high stress calves that need a consistent, nutrient dense, palatable feed to get a quick start
- Transitions calves onto feed quickly with a familiar texture similar to pelleted creep feed
- Can be fed in a bunk fed environment

*All American Co-op is a licensed manufacturer of Purina products.*

*All of the Stress Care Supplements are manufactured and pelleted at our Stewartville Mill.*

# From Producers Like You!

## Shea Farms- Lime Springs, IA: Matt and Dana Shea

We have been using stress care products for over 6 years now and never start a group of cattle without using some type Stress Care product. Whether it is home raised calves, long haul Western cattle or locally purchased sale barn cattle, there is a stress care product that fits each group's needs. Stress care tubs have been a staple for weaning, receiving and transitioning our cattle. When paired with a balanced ration and fresh Stress Care 1, 5 or 10 pellets from All American Co-op's pellet mill, our cattle get a successful start every time.

## Holst Cattle Farm- Lanesboro, MN: Glen, Jeremiah and Justin Holst

Stress Care tubs are a part of our weaning program for 2 years. We notice the calves congregate to the tubs at weaning time which brings them to the bunk and gets them a better start. We have experienced less health challenged calves at weaning and through the transition period, which is extremely important to our all natural feeding program. We offer the Stress Care tubs in our 1st and 2nd calf heifer groups from calving through pasture turnout as well as providing them to our bulls. We have definitely seen the difference in the cattle on the Stress Care program.

## Jim Marzolf - Preston, MN

The Stresscare products will always be on my farm! The Stresscare Tubs provide basic nutrient needs for new groups as they transition into their new environment and feeding routine. The service that the All American Co-op team provides is worth as much as the right products, that's why they have my business!
