

"Working with you"

All American Co-op is a feed, grain, and agronomy cooperative in SE Minnesota. We offer state of the art precision ag services with our GrowMor program, competitive feed manufacturing and delivery services, and leading edge grain marketing services. Our co-op is partnered with Winfield United & Purina Animal Nutrition thru Land O Lakes to offer a great learning package for our summer interns.

Agronomy Interns

All American Co-op is looking to hire 3-4 summer agronomy interns for our Stewartville, Elgin, and Plainview, locations. Whenever possible we like to hire students local to the area as it helps to facilitate housing and fosters a relationship with them for future opportunities. We hire Freshman, Sophomores, and Juniors interested in completing a crop scouting internship. We utilize Winfield United for training purposes and offer a crop scout school in River Falls at the beginning of the internship. Winfield United also has a wrap up event at their corporate office where interns present to their peers a recap of their experience during the summer. This is a great event for interns to network with their peers and also with members of Winfield United and others in the industry.

In the past we have offered a second year agronomy internship to those students interested in focusing on agronomy sales. Here again we partner with Winfield United, students attend a two day training focused on sales and marketing experiences. These agronomy sales interns also attend the wrap up event at the corporate office at the end of the summer.

Feed Interns

All American Co-op is looking to hire 1-2 summer feed interns to work alongside our animal nutrition team covering the entire SE Minnesota trade territory. Our summer interns are assigned research projects in collaboration with Purina Animal Nutrition that encourage building skills and relationships with our producers. Whenever possible we like to hire students local to the area as it helps to facilitate housing and fosters a relationship with them for future opportunities. We hire Freshman, Sophomores, and Juniors interested in completing a feed internship. We utilize Purina Animal Nutrition for training purposes and offer a sales & marketing training event held at the Purina Farm in Gray Summit, MO at the beginning of the internship. Purina also has a wrap up event at their corporate office where interns present to their peers a recap of their experience during the summer. This is a great event for interns to network with their peers and also with members of Purina and others in the industry.

All American Co-op does some of our own recruiting at college career fairs, we also rely on Land O'Lakes to help supply us with a list of potential candidates for internships and full time positions. Our agronomy recruiting contact for Land O'Lakes is Ryan Gosch. Our Purina recruiting contact is Larry Boehm. Both Ryan and Larry have a broad outreach and has opportunities that can fit interns throughout the upper Midwest and western regions of the United States.
