

LAND O LAKES® Electrolyte Complete

Provides nutritional support for calves

- ✓ Can be fed to a variety of animals including calves, foals, kids, lambs, pigs, deer, llamas, alpacas and elk calves
- ✓ Is formulated to meet electrolyte standards set by university experts to assist with heat stress and scours

Available in a 25-lb. bag, a 10-lb. pail and a single serving pouch

Animals, like humans, are made mostly of water

When animals experience dehydration and electrolyte loss, these imbalances must be addressed quickly.

LAND O LAKES® Electrolyte Complete is designed to:

- Address dehydration early
- Support animals experiencing heat stress
- Provide nutritional support during health challenges
- Assist with optimal intake

Features	Benefits
Sodium bicarbonate	Supports optimal pH balance and hydration
High dextrose	Provides quick energy
Vitamin B complex	Supports intake
Zinc	Supports immune function and tissue health
Malic acid	Helps reduce the potential for excess D lactic acid ¹

Feeding considerations:

Provide LAND O LAKES® Electrolyte Complete in between milk feedings. Do not mix LAND O LAKES® Electrolyte Complete with milk or milk replacer. Orange in color when mixed to easily differentiate from water.

For larger animals (calves, foals*, elk calves): Feed 2 quarts of LAND O LAKES® Electrolyte Complete per 100 pounds of body weight every 6-8 hours.

For smaller animals (kids, lambs, pigs, deer, alpacas and llamas): Feed 3.5 ounces of LAND O LAKES® Electrolyte Complete per 5 pounds of body weight every 6-8 hours.

Always provide fresh, clean water beginning on day two.

*Always follow label directions.

Let's talk about a calf program to meet your farm goals.
